

Prometheus

Computing cluster

operating system: Linux CentOS 7

configuration: HP Apollo 8000, HPE ProLiant DL360 Gen10

processors: Intel Xeon (Haswell / Skylake)

computing cores: 53604

GPGPU: 144 (Nvidia Tesla K40 XL)

RAM: 282 TB

storage: 10 PB

computing power: 2403 TFlops

current TOP500 rank: 174 (June 2019)

More information on the [KDM](#) web site (in Polish).
